

Giridhar Pai

Information Security Analyst | SOC & Threat Detection | Risk & Vulnerability Assessment | Blue Team

Bantwal, Karnataka, India | +91 96201 36007 | giridharpai22@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Professional Summary

Information Security graduate specializing in SOC operations, SIEM-based investigation, and risk-driven vulnerability assessment. Hands-on with Splunk Enterprise Security and SOAR through 10 completed Splunk certified learning modules, applying NIST/OWASP-aligned practices to incident analysis, security documentation, and remediation guidance. Blue Team and digital forensics experience through hackathons and CTFs; Top 1% globally on TryHackMe.

Core Competencies

- Risk assessment, security controls, and vulnerability management lifecycle.
- Security monitoring, alert review, and incident analysis (identify–contain–eradicate–recover).
- Vulnerability assessment and secure application review.
- Digital forensics and metadata-based investigation.
- Documentation, reporting, evidence tracking, audit support, and process adherence.
- Communication, teamwork, client-facing professionalism, and coordination.
- Time management, structured follow-up, and task ownership.
- Strong attention to detail, confidentiality, and accountability.

Education

Yenepoya University, Mangalore

Jul 2023 – Jul 2026

BCA in Cyber Security, Ethical Hacking, and Digital Forensics (IBM Industry Collaboration)

CGPA: 9.15

- Specialized in cybersecurity fundamentals, ethical hacking, digital forensics, and practical defense-oriented workflows.

S N Moodbidri Polytechnic

Aug 2019 – May 2022

Diploma in Computer Science and Engineering

Certifications

- **Security Operations & SIEM**
 - Splunk Training: 10 courses including Enterprise Security, SOAR, and Defense Analyst
 - Splunk: The Complete Course from Zero to Hero
- **Cloud, Network, and Cybersecurity Foundations**
 - AWS Certified Security – Specialty: Exam Prep (Coursera/Whizlabs)
 - CompTIA A+ Cyber & Network (Coursera)
 - Google Cybersecurity Specialization
 - Digital Forensics Essentials (EC-Council)
- **Advanced & Specialized Credentials**
 - Certified Red Team Operations Management (CRTOM) – Red Team Leaders
 - Certified Cybersecurity Educator Professional (CCEP) – Red Team Leaders
 - CAPIE – Certified API Hacking Expert – The XSS Rat
 - CSCSO – Certified SME Cyber Security Officer – EU Cyber Academy / ICTTF
- **Practical Simulations and Platforms**
 - Deloitte Australia Cyber Job Simulation (Forge)
 - SAP Analytics Cloud: Managing Security and Administration
 - TryHackMe – 13 certifications; Top 1% globally

Technical Skills

- **Risk & Compliance:** Risk assessment, vulnerability management lifecycle, NIST framework alignment, OWASP Top 10, MITRE ATT&CK fundamentals, security controls, audit-oriented record keeping.
- **Security Operations:** SIEM (Splunk), alert review, threat hunting, incident response lifecycle, vulnerability assessment, DDoS mitigation, IDS/IPS concepts.
- **Identity & Access:** IAM fundamentals, access control principles, AWS IAM/Secrets Manager, secure cloud architecture.
- **Forensics:** Digital forensics, metadata extraction, heatmap analysis, evidence documentation.
- **Compliance & Governance Support:** Documentation support, evidence tracking, process adherence, confidentiality.

- **Productivity & Coordination:** Microsoft Excel, Google Sheets, trackers, documentation workflows, and reporting support.

Tools & Technologies

Splunk (Enterprise Security, SOAR), Linux, Docker, Python, Java, C, JavaScript, SQL, HTML/CSS, Git, Excel, Google Sheets, Wireshark, Nmap, Burp Suite, Kali Linux, TryHackMe, Security Onion, ELK Stack, Jira

Experience

Freelance Security Engineer / Cloud Security Consultant

Mar 2025 – Present

Freelance – Remote

- Delivered freelance security architecture and consulting projects across manufacturing, supply chain, finance, retail, and healthcare domains, focusing on identity security, cloud hardening, and secure system design.
- Designed IAM policies, access controls, and secure session handling tailored to each client's domain and threat model.
- Implemented cloud-hardened architectures (AWS/Azure) covering network segmentation, encryption, and secure data flows.
- Delivered a freelance web and security consulting engagement for an industrial solutions company (Quartz Tech Trading, UAE), supporting web presence and baseline security hygiene.

IBM Internship – Tejas Raksha (Yenepoya University)

Mar 2026 – Apr 2026

Cybersecurity Intern – Zero Day Scanner for Agricultural Portal – Cybersecurity Developer

- Independently built an automated web vulnerability scanner (FastAPI, Celery, PostgreSQL, Redis, React) detecting 12+ OWASP Top 10 vulnerability classes using 15+ detection techniques, with real-time WebSocket progress and JSON/HTML/PDF reporting.
- Validated the scanner across 9 scans on live test targets, surfacing 794 findings at 94% average confidence and ~15% false positive rate via multi-stage confidence scoring.
- Documented findings with risk ratings, clear remediation guidance, and secure coding recommendations aligned to industry best practice.
- Maintained structured technical notes and organized outputs to support follow-up, review, and reporting.

IBM Academic Internship / Industry Collaboration (Yenepoya University)

2025 – 2026

Cybersecurity Intern – DDoS Mitigation System Project – Cybersecurity Developer

- Worked on an IBM-linked academic cybersecurity project focused on defensive security, monitoring, and digital forensics as part of a team.
- Assessed traffic-pattern risk and built a DDoS mitigation system to detect suspicious activity and reduce the impact of volumetric attacks.
- Applied defensive security concepts in traffic analysis, project documentation, and workflow execution.
- Supported coordination and reporting while following defined academic and project deadlines.

Simulations & Training

Deloitte Australia Cyber Job Simulation (Forage)

2025

Cyber Security Simulation – SOC Analyst Role

- Completed enterprise cybersecurity tasks involving security monitoring, incident analysis, and risk assessment in a SOC-style capacity.
- Practiced alert review, structured documentation, and response reporting as part of a simulated Blue Team workflow.
- Strengthened communication, analytical thinking, and problem-solving through online client-facing cybersecurity simulation.

Inplant Training – Agile Tec, Mangalore

Apr 2022

Trainee – Android App Development

- Completed a 3-week in-plant training program in Android application development under the guidance of Mr. Krishnaraj, Managing Director.
- Gained hands-on exposure to mobile development workflows, project structure, and team-based problem solving.

Projects by Type

Hackathon Projects

AI-Powered Deepfake Detection System

2025

CIDECODE Hackathon – Consolation Prize

- Developed a deepfake detection tool using metadata extraction and heatmap analysis for identifying manipulated media (~99% test accuracy).
- Demonstrated applied digital forensics concepts in a team hackathon setting with Santeena and Santhosh.

DefendX

2025

IBM ICE DAY 2025 – 2nd Runner-Up

- Built a real-time threat detection and monitoring system to demonstrate real-time threat monitoring concepts for enterprise security operations.
- Focused on alerting, monitoring, and defender-centric visibility for security teams in a team hackathon project.

Future City Hackathon Project

2025

Smart City Infrastructure Challenge

- Collaborated on a smart city infrastructure project focused on security and resilience.
- Contributed to design and implementation of secure urban systems.

Internship Projects

Tejas Raksha

2026

IBM Internship – Zero Day Scanner for Agricultural Portals

- Built a full-stack security scanner (FastAPI, Celery, PostgreSQL, Redis, React, Docker Compose) detecting 12+ OWASP Top 10 vulnerability classes via 15+ detection techniques.
- Delivered real-time WebSocket scan progress, multi-format (JSON/HTML/PDF) reporting, scheduled scans, and a 25+ endpoint REST API; validated on live targets with 794 findings at 94% average confidence. Developed the project fully independently.

DDoS Mitigation System (IBM Academic Internship)

2025 – 2026

IBM Industry Collaboration – DDoS Mitigation System Project [OFFLINE]

- Built a DDoS mitigation system to detect suspicious traffic patterns and reduce distributed denial-of-service attacks, focusing on backend development.
- Applied defensive security concepts in traffic analysis, project documentation, and workflow execution as part of a team.
- Supported coordination and reporting while following defined academic and project deadlines.

Freelancing Projects

Manufacturing Vault

Mar 2026 – Apr 2026

Cloud Security Architecture – Manufacturing Client

- Designed a cloud-hardened security architecture for a manufacturing client, covering IAM, secure data handling, network segmentation, and logging aligned with real-world cloud security and SOC monitoring practices.

Kinetic Forge

Mar 2026 – Apr 2026

Identity Security Framework – Supply Chain Client

- Built an identity security framework for a supply-chain client – defined roles, access policies, and secure session handling for suppliers, internal users, and external partners.
- Documented threat scenarios and mapped them to monitoring controls.

Vault Protocol

Mar 2026 – Apr 2026

Identity Security Framework – Finance Client

- Created a finance-focused identity security framework for a client handling high-value transactions, with secure authorization flows, approval-flow design, audit logging, and credential protection.

Retail Data Security

Mar 2026 – Apr 2026

Cloud Infrastructure Hardening – Retail Client

- Hardened a cloud infrastructure design for a retail client, covering customer data protection, secure storage, encryption, and monitoring to reduce data exposure risk.

Obsidian Pulse

Mar 2026 – Apr 2026

Identity Security Framework – Healthcare Client

- Developed an identity security framework for a healthcare client, with strict access control, role separation, audit trails, and secure handling of sensitive patient data.

Kids Wonder Learn (KWL)

2025 – 2026

Browser-Based Educational Platform [OFFLINE]

- Built a browser-based educational platform for children aged 2–13+ with student, parent, teacher, and admin roles.
- Developed interactive learning modules including games, art tools, story content, login workflows, dashboards, progress tracking, and activity logging.
- Used HTML5, CSS3, Vanilla JavaScript, Supabase, and Netlify to design a modular and scalable front-end architecture.
- Documented deployment flow, data flow, configuration management, and migration path from localStorage to Supabase.

Quartz Tech Trading

Dec 2025 – Jan 2026

Freelance Web & Security Consulting – Industrial Solutions Client (UAE)

- Supported web presence and baseline security hygiene for a UAE-based industrial hydraulic solutions company.

Personal Projects

Password Strength Checker

2024

Client-Side Password Entropy Tool

- Built a client-side tool to evaluate password entropy and weak patterns and promote stronger password practices.

Doctors Appointment Booking System

2023

Healthcare Workflow System [OFFLINE]

- Developed a workflow-driven healthcare appointment system with authentication, access control, and offline deployment concepts.
- Received Best Project Award for this system.

Achievements

- Ranked in the Top 1% globally on TryHackMe with 13 certifications.
- Secured 2nd Place in the IBM ICE DAY 2025 CTF Competition.
- Finalist in CODE SPRINT Hackathon (Top 7 of 65 teams).
- Consolation Prize, CIDECODE Hackathon.
- Received Best Project Award for the Doctors Appointment Booking System.

Activities and Community

- Member, OWASP Yenepoya.
- Active participant in CTFs, hackathons, cybersecurity learning platforms, and student security activities.
