

Giridhar Pai

Cyber Security Analyst | SOC Operations, SIEM Detection & Risk Management

Bantwal, Karnataka, India | +91 96201 36007 | giridharpai22@gmail.com

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Summary

Information Security graduate focused on SOC operations, SIEM detection engineering, and risk-driven vulnerability management. Hands-on with Splunk Enterprise Security, log analysis, incident triage, and automated vulnerability scanning; applies NIST, OWASP, ISO 27001, and MITRE ATT&CK frameworks to secure remediation and incident documentation. Top 1% globally on TryHackMe (13 certifications); 2nd Place, IBM ICE DAY 2025 Hackathon CTF.

Core Skills

- **SIEM & SOC Operations:** Splunk (Enterprise Security, SOAR), alert monitoring/triage, incident response lifecycle (identify–contain–eradicate–recover), log analysis (firewall, auth, proxy logs), threat hunting, MITRE ATT&CK fundamentals, IDS/IPS
- **Vulnerability Assessment & AppSec:** Vulnerability scanning, multi-stage confidence scoring, OWASP Top 10, Burp Suite, Nmap, Metasploit, secure remediation tracking
- **Risk & Compliance:** Risk assessment, vulnerability management lifecycle, security controls, NIST framework alignment, ISO 27001 fundamentals, audit support fundamentals, security documentation
- **Identity & Cloud Security:** IAM fundamentals, access control principles, AWS IAM/Secrets Manager/Shield, secure cloud architecture basics
- **Network & Forensics:** TCP/IP, OSI Model, DNS/HTTP/HTTPS, Wireshark packet analysis, EDR concepts, digital forensics, metadata extraction, evidence documentation
- **Tools & Languages:** Linux, Kali Linux, Docker, Python, Java, C, JavaScript, SQL, Git, Jira/ServiceNow (lab exposure), Security Onion, ELK Stack

Experience

Cybersecurity Intern – Zero-Day Web Vulnerability Scanner

Academic Internship

IBM Collaboration “Tejas Raksha” (Yenepoya University), 2026

- Engineered an automated web vulnerability scanner (FastAPI, Celery, PostgreSQL, Redis, React) detecting 12+ OWASP Top 10 vulnerability classes using 15+ detection techniques, featuring real-time WebSocket progress and multi-format reporting.
- Validated the scanner across 9 scans on live test targets, surfacing 794 findings at 94% average confidence and ~15% false positive rate via multi-stage confidence scoring; documented risk ratings and secure remediation guidance.

Cybersecurity Intern – Real-Time DDoS Attack Mitigation System

Academic Internship

IBM Industry Collaboration (Yenepoya University), Sep–Nov 2024

- Maintained 99.9% uptime under active Layer 7 DDoS conditions (HTTP flood, Slowloris) by engineering a real-time mitigation system with threshold-based anomaly detection, dynamic rate limiting, and WAF/CAPTCHA integration.
- Blocked automated botnet traffic in real time by building IP-reputation and request-pattern analysis into a Python/NGINX-based detection pipeline engineered for low-latency performance at scale.
- Supported defensive security monitoring, system log review, evidence documentation, and incident reporting.

Cyber Security Job Simulation

Virtual Simulation – Deloitte Australia (Forage), 2025

- Triageed simulated SOC alerts end-to-end – from initial detection through risk-based prioritization and documented response – in Deloitte’s guided cybersecurity operations simulation.

Projects

- **DefendX** – Real-time threat detection and monitoring system focused on alerting and defender visibility; 2nd Runner-Up, IBM ICE DAY 2025 (team hackathon project).
- **AI-Powered Deepfake Detection** – Achieved 99% detection accuracy on manipulated video/image media by building a PyTorch/TensorFlow deep-learning pipeline with heatmap-based region highlighting and metadata extraction for investigator use; Consolation Prize, CIDECODE DeepFake Hackathon.
- **Password Strength Checker** – Built a client-side password strength evaluator that scores entropy and flags common weak patterns in real time, without transmitting input to a server.

Certifications & Training

- TryHackMe: 13 certifications, Top 1% globally – incl. SOC Level 1 & 2, Jr Penetration Tester, Pre Security
- AWS Certified Security – Specialty: Exam Prep (Coursera/Whizlabs) | CompTIA A+ Cyber & Network (Coursera)
- Google Cybersecurity Specialization | Digital Forensics Essentials (EC-Council) | OWASP Top 10 (2021) (Infosec)
- CCEP (Red Team Leaders) | Splunk Certified Learning Modules (10 completed): Enterprise Security, SOAR, Threat Detection, Investigation, Visualizations | SAP Analytics Cloud Security

Education

Yenepoya University, Mangalore

2023 – 2026

BCA, Cyber Security, Ethical Hacking & Digital Forensics (IBM Industry Collaboration) – CGPA: 9.15

S N Moodbidri Polytechnic

2019 – 2022

Diploma, Computer Science & Engineering

Achievements

- Ranked in the Top 1% globally on TryHackMe with 13 specialized certifications.
- Secured 2nd Place in the IBM ICE DAY 2025 CTF Competition; Finalist in CODE SPRINT National Hackathon (Top 7 of 65 teams); Consolation Prize, CIDECODE DeepFake Hackathon.
- Received Best Project Award for the Doctors Appointment Booking System.
