

Giridhar Pai

Information Security Analyst | SOC Analyst | Cybersecurity Analyst (Fresher)

Bantwal, Karnataka, India | +91 96201 36007 | www.giridharpai@gmail.com

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Summary

Information Security graduate focused on SOC monitoring, vulnerability assessment, and Splunk-based detection engineering. Top 1% globally on TryHackMe (13 certifications); 2nd place, IBM ICE DAY 2025 CTF. Hands-on experience with OWASP Top 10 web vulnerability scanning, log analysis, and cloud security fundamentals through academic internships and industry simulations.

Core Skills

- **SIEM & SOC:** Splunk (Enterprise Security, SOAR), alert monitoring/triage, threat hunting, incident response basics, log analysis (firewall, auth, proxy logs)
- **Vulnerability Assessment & AppSec:** Vulnerability scanning, OWASP Top 10 concepts, Burp Suite, Nmap, Metasploit, secure coding recommendations
- **Network Fundamentals:** TCP/IP suite, OSI Model, DNS/HTTP/HTTPS, VPN concepts, subnetting, Wireshark packet analysis
- **Endpoint & Forensics:** EDR concepts, malware types, Windows/Linux log review, digital forensics, metadata extraction, evidence documentation
- **Cloud Security:** AWS fundamentals (IAM, Secrets Manager, Shield), secure cloud architecture basics
- **Tools & Languages:** Linux, Kali Linux, Docker, Python, Java, C, JavaScript, SQL, Git, Jira/ServiceNow (lab exposure), Security Onion, ELK Stack

Experience

Cybersecurity Intern – Zero-Day Web Vulnerability Scanner

Academic Internship

IBM Collaboration “Tejas Raksha” (Yenepoya University), 2026

- Independently developed an automated web vulnerability scanner for agricultural portals to detect OWASP Top 10 issues and support secure application reviews.
- Documented vulnerabilities comprehensively with clear remediation guidance and secure coding recommendations in a structured reporting format.

Cybersecurity Intern – DDoS Mitigation System

Academic Internship

IBM Industry Collaboration (Yenepoya University), Sep–Nov 2024

- Built a DDoS mitigation system to detect suspicious traffic patterns and reduce the impact of volumetric attacks in a controlled lab environment.
- Supported defensive security monitoring and digital forensics tasks, including system log review and incident documentation.

Cyber Security Job Simulation

Virtual Simulation – Deloitte Australia (Forage), 2025

- Practiced enterprise-style SOC alert review, incident analysis, and response documentation within a guided simulated environment.

Projects

- **DefendX** – Real-time threat detection and monitoring system focused on alerting and defender visibility; 2nd Runner-Up, IBM ICE DAY 2025 (team hackathon project).
- **AI-Powered Deepfake Detection** – Team hackathon project utilizing metadata extraction and heatmap analysis to identify manipulated media (~99% test accuracy); Consolation Prize, CIDECODE DeepFake Hackathon.
- **Future City Hackathon Project** – Smart city infrastructure challenge contributing to secure design considerations for resilient urban systems.
- **Password Strength Checker** – Client-side security tool evaluating password entropy and weak pattern matching.

Certifications & Training

- TryHackMe: 13 certifications, Top 1% globally – incl. SOC Level 1 & 2, Jr Penetration Tester, Pre Security
- AWS Certified Security – Specialty: Exam Prep (Coursera/Whizlabs) | CompTIA A+ Cyber & Network (Coursera)
- Google Cybersecurity Specialization | Digital Forensics Essentials (EC-Council) | OWASP Top 10 (2021) (Infosec)
- CCEP (Red Team Leaders) | Splunk Certified Learning Modules (10 completed): Enterprise Security, SOAR, Threat Detection, Investigation, Visualizations | SAP Analytics Cloud Security

Education

Yenepoya University, Mangalore

2023 – 2026

BCA, Cyber Security, Ethical Hacking & Digital Forensics (IBM Industry Collaboration) – CGPA: 9.15

S N Moodbidri Polytechnic

2019 – 2022

Diploma, Computer Science & Engineering

Achievements

- Top 1% globally on TryHackMe (13 certifications)
- IBM ICE DAY 2025 CTF – 2nd Place; CODE SPRINT National Hackathon – Finalist (Top 7 of 65 teams); CIDECODE DeepFake Hackathon – Consolation Prize
- Best Project Award, Doctors Appointment Booking System
